

BW Xchange for Sage BusinessWorks 50

BW Xchange is the most flexible solution for integrating E-Commerce and Electronic Data Interchange (EDI) with Sage Business Works

Is your business facing these opportunities or challenges?

- Want to take advantage of the growing opportunity to sell your products on the web?
- Being required by big customers to process orders through EDI?
- Drowning in manually entering orders coming from your Web Store or EDI?
- Want to receive orders collected on Hand-Held devices?

BW Xchange for Sage BusinessWorks is the solution for you! BW Xchange is software that can provide an integrated connection between virtually any source of customer sales orders and Sage BusinessWorks. Orders from E-commerce Shopping Carts or EDI Translators are received by BW Xchange and easily imported into BusinessWorks for further processing.

Repetitive manual data entry is eliminated saving time and improving efficiency and accuracy. This significantly reduces costs and augments customer satisfaction.

BW Xchange is written in Microsoft Access and is available in versions that integrate with E-Commerce, EDI and Hand Held software (*listed below*) or it can be customized to meet the formats of other external order collection systems. The solution is provided with source code for end-user modification or is customized by SWK to meet your exact requirements.

Businesses currently using BW Xchange include: Pecaso Lighting, Pyramex Safety, San Joaquin Fisheries, Sightron, Audio Energy, Ollar Consulting and Red Barn Pet Products for EDI; Service Lighting, Island Soap, Custom Company and Nutone Sales for E-Commerce; Point of Activity and Mill Point Solutions with Hand Held solutions.

BW Xchange versions include:

E-Comm Xchange for Yahoo, Americart, and Custom PHP/My SQL Shopping Carts
EDI Xchange for True Commerce

In addition to what is available now, there are other versions in the development stage including: EDI Exchange for DI Central and E-Comm Xchange for StoreFront. Custom versions available for virtually any shopping cart or translator and hand held software. Again, the solution is provided with source code for end-user modification or it will be customized by SWK to meet your exact requirements.
