

Find out how  
**McAfee SaaS Bundles**  
Protect Your Business

# KEEP OUT!

If you **don't have** a complete email and web defense solution, you are leaving your business network wide open to the enemy: attacks from destructive spam, viruses, worms, spyware and all breeds of malware.

**There is a solution.** Keep your email network protected, your employees safe, and your business in compliance with easy and effective services from McAfee SaaS, now bundled together to address the unique needs of your organization.

You get **complete protection** through our Service Bundles that include packaged combinations of Email Security, Web Security and Message Archiving solutions.

McAfee SaaS Bundles! There is **no easier or more effective way** to keep blended security threats outside your network and keep your email archived and available.

### Email Security

Protects your organization from spam, viruses and worms, email attacks and fraud, while enabling ongoing communications during server outages.

### Web Security

Works outside the network perimeter to ward off spyware and viruses, while enabling you greater control over non-business-related Internet use.

### Message Archiving

Provides the industry's safest and most reliable email archiving and retrieval capabilities, and integrates seamlessly with our comprehensive and easy-to-use Web-based administrative console.
