

# Radio Beacon Solutions for Sage MAS 500

Complete solutions that enable small and mid-sized distributors to compete!

Look to Radio Beacon for the tools to expand warehouse capacity without adding resources.

Enables clients to accurately meet larger, more complex, customer demands.

Manage and exceed service expectations by consistently getting orders out the door faster without additional warehouse staff.

## SMALL AND MEDIUM SIZED BUSINESSES PREPARE FOR GROWTH

Small to mid-sized manufacturers and distributors have an unparalleled opportunity to increase order volumes and provide world-class customer service without additional warehouse operating costs. Radio Beacon customers manage and increase service expectations by consistently getting orders out the door faster, without adding warehouse staff.

### A COMPLETE WAREHOUSE MANAGEMENT SOLUTION

Radio Beacon solutions use the latest technologies to drive the costs out of materials handling. Rather than using outdated information provided by paper warehouse processes, Sage MAS 500 ERP customers can employ real-time inventory information to make more informed decisions.

- Allocate stock to orders based on site-specific rules or ad hoc requirements
- Reduce warehouse walk time through directed picking
- Group multiple orders and pick them in a single pass
- Increase picking accuracy by reducing the handling of goods in the warehouse
- Ensure the right goods are shipped in the right carton to the right customer with interactive verification of every function
- Eliminate manual data entry and the potential keying errors associated with paper processes
- Maintain an accurate perpetual inventory without interrupting operations with real time cycle counting
- Simplify reconciliation errors with real-time discrepancy reports

### REAL-TIME INVENTORY MANAGEMENT FOR MAS 500

Optimize your warehouse resources with a Radio Beacon solution!

- Real-time validation as goods are received, moved and picked
- Real-time stock level and precise physical location tracking and reporting
- Barcode labeling for customer and carrier compliance
- Eliminate redundant, error-prone data entry
- Real-time visibility by bin inventory
- Integrated wireless devices make bin management effortless

### IMPROVE WAREHOUSE PERFORMANCE

Streamline warehouse operations with a Radio Beacon solution!

- Drive costs out of every warehouse operation including receiving, stock movement, picking, packing and shipping
- Validate items using wireless devices as they are picked, received or moved
- Optionally, use batch driven, paper-based picking documents to collect orders and validate at a packing station
- Integrate multi-carrier shipping to further streamline outbound processes

### IMPROVE INVENTORY AND ORDER STATUS VISIBILITY

Sage MAS 500 is updated with real-time order status information!

- Immediate feedback from the warehouse provides customer service and operations with up to the second status of warehouse activity
- Sort and select Packslips for processing based on real-time status
