Sage BusinessWorks

Combining robust features and high-level performance to give growing businesses the power to increase profitability through greater efficiency

Power & Simplicity In A Single, Integrated Solution

Sage BusinessWorks is a step up from basic accounting software. With features usually reserved for systems costing thousands of dollars more, it is a *business management* system that puts information vital to the success of your company right at your fingertips.

Designed for complete visibility, Sage BusinessWorks gives you the management tools you need to succeed. Now a single solution gives you a clear picture of your entire operation. Robust, user-friendly features and in-depth reporting give you the power to maximize efficiency, discover new revenue opportunities and take control of your company's success.

The Right Solution For Your Growing Business

For small companies that have outgrown "off-the-shelf" accounting packages, Sage BusinessWorks is the powerful, user-friendly solution that puts every aspect of your business in clear view. If you thought you couldn't afford a business management solution that provides extensive and customizable reporting capabilities — and the ability to grow with your company — then Sage BusinessWorks will be an eye-opening discovery.

Increase Profitability Through Greater Efficiency

The Sage BusinessWorks solution simplifies and streamlines key business functions as well as daily activities. It gives you an instant link to critical, up-to-the-minute information to help you make the most informed decisions. Moving from task to task is straightforward and you can access data with a simple keystroke or mouse click.

Because it's a true business management system, every transaction leaves an audit trail and double entry accounting practices — all of which are designed to help protect your company from fraudulent activities. Its flexibility and comprehensive functionality afford possibilities that were previously unattainable for growing companies.

Make Informed Management Decisions

Information is king. Sage BusinessWorks gives you access to the information necessary to help your company operate at maximum profitability. Add extensive report customization options and you can give everyone the data they need, when they need it.

With more than 250 presentation-quality reports built into the system in addition to the built-in custom report writer and spreadsheet creator, the reporting system within Sage BusinessWorks helps you create reports designed to meet your unique needs. Through integration with Crystal Reports and a financial report writer, it provides even greater flexibility for companies with complex reporting requirements.

Simple Navigation Saves You Time & Reduces Errors

Consistent design and an intuitive interface make Sage BusinessWorks simple to set up, learn and navigate. Because it's designed to work the way you do, tasks can be launched through a traditional menu or through the clean, simple HTML interface. Shortcuts can be defined for fast access to frequently used options or tasks can be launched automatically through the Startups feature — saving

valuable time. For the novice user, it provides built-in checklists to guide you through periodic processes.

Sage BusinessWorks Reporting Gives You:

- Drill-down capabilities to the details of transactions

- Drill-down capabilities to the task screen

- Three levels of report customization:
    - Quick Reports for those who want to add, subtract or move fields; or change the filter or sort options
    - Comprehensive Reports for those who are more comfortable in the report design arena (allowing you to add, subtract or move fields, add calculations, add your own drill-down or drill-to fields and more)
    - SQL Report Programming available with the Custom Office module (in the Comprehensive Reports option)

- Virtually unlimited calculation abilities

- Access to all company data fields

- Option of adding tables to existing reports with the Custom Office module

- Columnar Quick Reports so they export into Microsoft Excel exactly as seen on screen

- Data pull capabilities from multiple modules through the Custom Office module for better business decisions

- Protection by utilizing the existing Sage BusinessWorks security model

Improve Productivity Through Integration

Through seamless integration with Microsoft Office, ACT! by Sage, Crystal Reports and other leading business solutions, Sage BusinessWorks gives you the tools needed to maximize power and efficiency — increasing your productivity and profitability.
