BizInsight™

Business Reporting & Analysis Made Simple, Powerful and Immediate.

What is BizInsight™?

BizInsight is a real-time integrated Excel-based business reporting and analytics solution that delivers simple, yet powerful reporting and analysis capabilities to companies of all sizes. BizInsight makes it easy for users to gain control of their reporting and analysis processes by ensuring data from their system ties to data in Excel.

- Pre-integrated to your ERP system
- Real time reporting
- Leverage your existing spreadsheets
- Drag and drop report creation
- Refresh reports on your own
- Report from multiple ERP modules
- Consolidate companies from different databases
- Multi dimensional drill-down
- Rapid report generation with In-Memory caching

BizInsight ™

Business Reporting & Analysis Made Simple, Powerful and Immediate

Direct Link to your Business Data
BizInsight directly integrates your business data with Excel, removing the need for a data warehouse, providing end users with the assurance that data in Excel always ties.
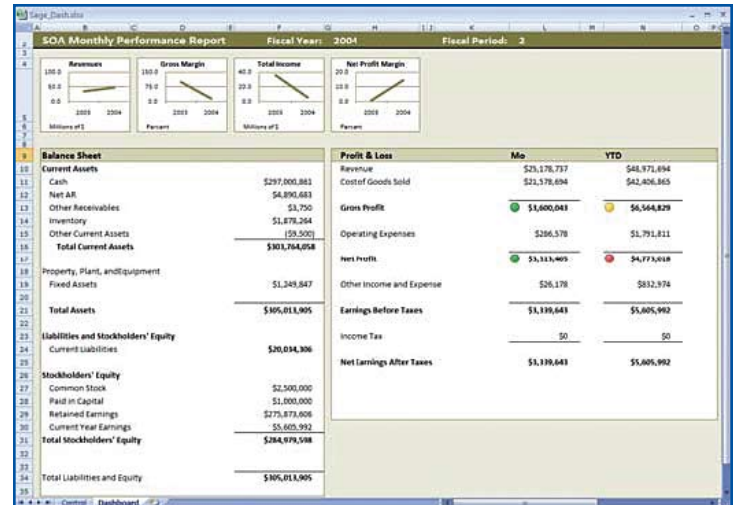

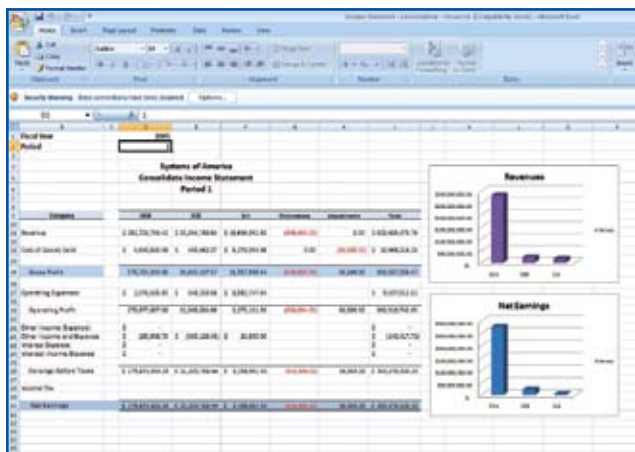

100% Excel-based
BizInsight makes it easy for end users to produce accurate reports with detailed audit trails all within Excel. Companies can make better use of their existing spreadsheets and no longer have to rely upon a single power report builder to create new reports.

Robust Reporting & Analysis
With BizInsight, you can create drag and drop reports, utilize reporting templates and create fully integrated reports from existing spreadsheets all within Excel.

Dynamic Multi-Dimensional Drill Down empowers end users with the ability to get answers to business questions immediately.

BizNet BizInsight Advantages:

Simple
• Easy to install (Installs within minutes)
• Leverage existing spreadsheets
• Easy to use (Use your Excel skills)
• Includes Report Template Library

Powerful
• Refresh and reformat reports on the fly
• Multi-dimensional drill down
• Drag and Drop Reporting
• Consolidate information from multiple systems

Immediate
• Pre-Integrated to your business data
• Post entries into your system and have the information reflected in reports
• Generate reports faster with In-Memory Caching
• Reduce closing cycles

" **With about 5 minutes of training, I was able to build my own ad-hoc financial reports.** "

- **Linda Hill,** CFO
  G2 Secure Staff

" **When a CFO says WOW in the first 3 minutes of a presentation, you know you have something.** "

- **Cherry Williamson,** Principal
