

QuickBooks Enterprise Shines for Solar Company

Hawaii manufacturer handles complex inventory with ease while enjoying peace of mind with the QuickBooks Enterprise Full Service Plan.

The right fit. As vice president of purchasing & product development at R&R Solar Supply in Honolulu, Hawaii, Aaron Langhoff estimates he receives three offers a month to try accounting software other than QuickBooks Enterprise. “We’ve had QuickBooks for over 10 years,” he says. “It grows with our business.”

R&R Solar Supply

Industry: Manufacturing

Business Challenge:

Tracking inventory

Prior Software:

QuickBooks Pro

“Nothing we’ve seen is as good as QuickBooks or does what we need for our business.”

— Aaron Langhoff, VP of purchasing & product development

The 15-person company has a 10-user license for QuickBooks Enterprise. Langhoff says he appreciates the role-based access it provides.

Inventory made easy. R&R Solar manufactures and sells solar products to contractors. Langhoff says the advanced inventory feature in QuickBooks Enterprise is crucial to ensuring the company has the right parts available to assemble each order of photovoltaic panels or other solar products.

“The building and kitting capabilities in QuickBooks Enterprise are essential to our business,” he says.

Tracking all of the company’s inventory in QuickBooks Enterprise allows the company to easily cost out a solar panel that a customer has ordered. “When we make a solar panel, we use parts from our inventory. This is very easy to track in QuickBooks.”

Peace of mind. When R&R Solar added advanced inventory, it also signed on to the Full Service Plan, which includes a host of extras, including unlimited technical support and product updates. “It’s always nice to know that we can pick up the phone and call Intuit. It’s really comforting.”

- ✓ Scales from 1 to 30 users
- ✓ Expanded list limits
- ✓ Predefined user roles
