

## True Cloud Construction Software Gives Home Builders Access to Business-Critical Information Anytime, Anywhere

*Manage your customers, subcontractors, and every aspect of the home building process with ease and complete control.*

Construction projects are a sea of moving parts. As a home builder, your ability to complete projects on time and on budget depends entirely on the level of collaboration between your central office and your field staff.

Whether you're involved in site development or home building, you rely on timely project data as you make strategic decisions that move projects—and your business—forward. Unfortunately, running a business with disconnected project teams results in delayed project updates, duplicate data entry, greater risk of errors, and unnecessary costs.

With Acumatica's true cloud construction software, you can easily manage your customers, finances—including job cost accounting—and field teams in one cohesive solution. The bottom line is that you'll increase your visibility, team collaboration, and profitability on every project.

*Easily manage projects and budgets*

### KEY BENEFITS

#### GAIN COMPLETE CONTROL, MAXIMIZE PROFITABILITY

- Run more profitable projects by accurately forecasting and managing job costs, payroll, overhead, profit, cash, and much more

#### FOCUS ON THE PROJECT, NOT THE PAPERWORK

- Get the latest software updates at no additional cost

#### GET THE BEST OF ALL WORLDS WITH CONNECTED CLOUD

- Integrate seamlessly with best-of-breed applications
- Connect to ProEst, Procore, Microsoft Office, DocuSign, and many more

## KEY FEATURES

**Financial Management**

Powerful financials that are simple enough for smaller contractors and scalable for more complex contractor needs. Acumatica Financial Management has standard financial processes (GL/AP/AR) and reports plus multicurrency, multicurrency and intercompany accounting, fixed assets, recurring and deferred revenue, and cash management.

**Job Cost Accounting**

Easily manage AP workflows, from entering an invoice through approval routing and cutting checks. Seamless customer billing, driven by real-time project costing, including up-to-date costs on labor, material, equipment, and more. This detailed job cost information will help you proactively identify problem areas in current jobs and provide you with information to accurately estimate future projects.

**Project Management**

Gain a complete view of your project details—including real-time field updates—providing instantaneous information flow between your project management team, your back-office workforce, and management. Easily manage and track all activities, issues, changes, project documents, and job costs from one central area.

**Payroll**

Flexible payroll adapts to any construction organization. This solution supports multiple unions, locals, classes, benefit packages, and complex wages, as well as certified wages, executive compensation, and commission structures.

**Commitments**

Control cost overruns by automating your project commitments and change order processes. Easily create and track the status of your subcontracts and purchase orders, including comparing budgets to actuals, tracking line-item committed costs, and monitoring up-to-date vendor payment status.

**Compliance**

Effectively manage lien waivers and releases, insurance certificates, and status updates, providing expiration and other alerts to staff and suppliers.

**Customer Relationship Management**

Easily see real-time data on all customer activities, including customer quotes, orders, invoices, payments, support cases, and service calls. Acumatica CRM also includes a self-service customer portal that lets customers access the information they need.

**Mobile App**

Get anytime, anywhere access. Quickly see key reports on phones and tablets and give field teams and subcontractors tools to enter employee and equipment time electronically. Access the complete system over any device and search for all project details from one global search box.
