

WORK FROM HOME SECURELY CHECKLIST

Protect your business from cyber threats. Ensure your employees are working securely with our checklist.

Remote Access

- Are employees connecting to a VPN in order to access the company network?
- Are employees connecting directly to company devices on the network?
- Are you using multifactor authentication (MFA)?

Home / Remote Network

- Are your employees connecting to a secure Wi-Fi network?
- Have you deployed additional measures to protect the home network against cyber threats?
- Are you meeting all regulatory requirements, if applicable?

End-User Devices

- Are employee-owned devices allowed to connect to the company network?
- Are all devices, company or employee-owned, encrypted?
- Are devices that are connected ONLY being used for work purposes?
- Is antivirus and malware protection deployed on all devices connecting to the company network?

Insurance

- Does your insurance cover a work from home environment?

Governance

- Do you have Cybersecurity Awareness training for your employees?
- Do you have procedures in place for working from home?

Don't let remote workers be a weakness, make them a strength. Contact us to learn more about how SWK can keep your business up and running.
