

FreightPOP TMS: Deliver a Superior Shipping Solution

FreightPOP and SWK Technologies partner to streamline logistics and ERP workflows. Together, they offer seamless Acumatica integration, optimized shipping, and enhanced efficiency for businesses seeking cost-effective, scalable solutions.

Seamless Integration, Simplified Management

Native Acumatica Integration

FreightPOP is built directly into the Acumatica platform, ensuring a smooth, native experience for users.

True Multimode Shipping

FreightPOP is designed to work with the unique business needs of your clients, with the ability to ship any combination of parcel, LTL, FTL, Ocean & Air directly in the platform.

Solution Highlights

Enhanced Efficiency

Streamline logistics and shipping operations, reducing manual efforts and save significantly on time.

Cost Savings

Clients can compare their rates, our rates, and marketplace rates to choose the most cost-effective shipping options.

Real-Time Visibility

Track inbound and outbound shipments in real-time, improving decision-making and customer service.

Automated Processes

Simplify freight auditing and billing, ensuring accuracy and financial integrity.

Why FreightPOP?

Expanded Service Offerings

Add value to Acumatica solutions with a multimode, user-friendly shipping management platform.

Increased Client Satisfaction

Help your clients optimize their logistics operations while saving significantly in freight spend and countless labor hours.

Dedicated Partnership Support

Users can leverage our U.S.-based support team of product experts and training resources.

Join Us in Revolutionizing Logistics for Acumatica Users

Team up with FreightPOP and equip your Acumatica clients with state-of-the-art logistics management. Our collaboration is the key to unlocking unparalleled shipping efficiency and enhanced user experiences.
